Switzerland

Decision tree for the United Kingdom to answer the question whether a certain work or other subject matter vested with copyright or neighbouring rights has fallen into the public domain.

Researcher: Christina Angelopoulos, Institute for Information Law, Amsterdam
National Expert: Ivan Cherpillo, BMP Associés
Introduction
In order to use works of authorship and other media on the Internet you need permission from rightsholders, to use them according to an exception established in copyright law or the work needs to be in the public domain. The copyright status of books, photographs and images of cultural heritage objects can be difficult to determine. This is especially true if you are attempting to determine their status in multiple jurisdictions.

The public domain calculators available on outofcopyright.eu answer the question whether a certain work or other subject matter vested with copyright or neighbouring rights (related rights) has fallen into the public domain. The Public Domain Calculators are a tool that can help with the effort of identifying public domain material in order to make it available online (or elsewhere). This document contains the flowchart and additional information relevant to answering this question for the United Kingdom.

The Public Domain Calculator is a research product of EuropeanaConnect and has been executed by Knowledgeland and the Institute for Information Law.
Information Boxes
(1) Please note that a single item might be protected by multiple layers of rights. For example, a CD will often comprise four layers of rights: if it contains music, that may be covered by copyright; any lyrics accompanying the music may also qualify for copyright protection, while the performers (musicians and singers or any other performer) as well as the phonogram producer may be protected by related rights. Similarly, a book may consist of text and illustrations, both of which may be protected by copyright. If an illustration is a photograph of a painting, a third layer of protection may be added. The term of protection of all relevant rights should be examined in order to determine whether the item as a whole is in the Public Domain or not. Please make sure you correctly identify and apply the Public Domain Helper Tool to all subject matter that qualifies for protection.

To this end, please also keep in mind that in accordance with Swiss law and for the purposes of this Public Domain Helper Tool:

A volume, part, instalment, issue or episode of a work shall be treated as if they are whole independent works. Individual parts or issues of magazines, newspapers and other periodical works should also be considered to be independent works. The Public Domain Helper Tool should accordingly be applied to each of these individually.

Where two or more persons have contributed to the creation of a work, it is a work of joint authorship. The Public Domain Helper Tool should accordingly be applied to the work as a whole. Copyright may also subsist in each of the individual contributions to the work of joint authorship, in which case the Public Domain Helper Tool should also be independently applied to these as well.

Individual items included in an (original or unoriginal) database may be independently protected. In this case, the Public Domain Helper Tool should also be applied to each of these individually.

(2) In order to determine whether a work is a work of copyright or not, please consult the following list. Please keep in mind that this list is only intended to be indicative and should not be understood as being either exhaustive or binding. Subject matter which does not seem to comfortably fall into any of these categories may nonetheless be protected by copyright and subject matter which does fall into these categories may not qualify for protection, subject to the provisions of Swiss law.

LITERARY OR ARTISTIC WORKS

LITERARY WORKS, such as texts of books, pamphlets, lectures, addresses, sermons, poems, computer programmes, etc.
ARTISTIC WORKS, such as works of drawing, painting, sculpture, engraving and lithography, sketches, sculptures, works of applied art, illustrations, original photographs, works expressed by a process analogous to photography, etc.

MUSICAL WORKS. This includes any musical composition with or without words, whether fixed in musical notation or other writing or not.

DRAMATIC OR DRAMATICO-MUSICAL WORKS, such as plays, choreographic works, entertainments in dumb show, etc.

CINEMATOGRAPHIC OR AUDIOVISUAL WORKS, such as feature films of all categories, music and dance films, music videos (music clips), advertisement films (ads), documentaries, video art, etc. Works expressed by a process analogous to cinematography are also included.

WORKS RELATIVE TO SCIENCE, such as maps, plans, three-dimensional works relative to geography, topography, architecture, etc.

DERIVATIVE WORKS, such as translations, adaptations, abridgements, arrangements of music and any other alteration of a literary or artistic work.

COLLECTIONS WHICH BY REASON OF THE SELECTION AND ARRANGEMENT OF THEIR CONTENTS CONSTITUTE INTELLECTUAL CREATIONS, such as encyclopaedias, anthologies, original databases, books of recipes, school textbooks, commemorative publications, etc.

(3) DISCLAIMER: In relation to neighbouring or related rights (i.e. rights over performances, phonograms, the first fixation of a film and broadcast) the Public Domain Helper Tool only applies when at least one of the right-holders is a Swiss national.

(4) For the purposes of this Tool, where two or more persons have contributed to the creation of a work (work of joint authorship), all contributors should be considered to be joint co-authors. The maker of each constituent part should be considered the author of that part. The author of a cinematographic or audiovisual work should be considered to be the director (Regisseur/réalisateur).

(6) For the purposes of this Tool, an author shall not be considered to be anonymous where there is no doubt as to his/her identity.
(7) The signatory states to the Berne Convention can be found at:
http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=15
The signatory states to the WIPO Copyright Treaty (WCT) can be found at:
http://www.wipo.int/treaties/en/ShowResults.jsp?lang=en&treaty_id=16
The signatory states to the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) coincide with the members of the World Trade Organization and can be found at:

Questions regarding the Research and Flowcharts
If you have any questions or comments on the legal research for the flowcharts used in the Public Domain Calculators, please contact Christina Angelopoulos at IViR.

Questions regarding Software, Development and Implementation
If you want to use, contribute or comment on the calculator software, found on outofcopyright.eu, please contact Maarten Zeinstra at Knowledgeland.

Disclaimer

The Public Domain Calculator is not intended to replace the case-by-case assessment by a legal expert of the public domain status of a copyrighted work or other protected subject matter. For legal certainty as to whether the term of protection of copyright or related rights has expired please contact a legal professional.

The Public Domain Calculator is intended to provide the public domain status of examined material exclusively in the selected jurisdiction. Please note that the public domain status of subject matter may differ between jurisdictions. In relation to neighbouring or related rights (i.e. rights over performances, phonograms, the first fixation of a film and broadcast), the Public Domain Calculator only applies when at least one of the right-holders is a national of an EEA state, with the exception of Switzerland, where the Public Domain Calculator only applies when at least one of the right-holders is a Swiss national.

The Public Domain Calculator does not cover questions of authors’ or performers’ moral rights.
